GrayKey At A Glance

Advances in smart phones introduces challenges for law enforcement

Mobile devices are a major source of evidence, but obtaining that evidence can be challenging. There are instances where the suspect or victim is reluctant to provide consent for releasing their device, collected devices are locked or warrants for holding a device expire and thus delaying resolution in time-sensitive investigations. Furthermore, agencies lack the budget or the personnel to handle the volume of devices that get collected over time. This can result in a backlog of devices that need to be reviewed and extending the time for case resolution.

Expedite your investigations with GrayKey

The speed of collecting data and the depth of data analysis is paramount in digital forensics. Grayshift is the leader in mobile device digital forensics, specializing in lawful access and extraction. The GrayKey device, is a state-of-the-art forensic access tool that extracts encrypted or inaccessible data from mobile devices and offers same-day extractions on locked iOS devices.

Only the GrayKey device can provide lawful same-day access for the latest iOS devices – often in less than one hour.

GrayKey is a device that is easy to use, offers the broadest support for iOS devices and is compatible with existing forensic analysis products. This plug-and-play platform is controlled by an easy-to-use web interface and is regularly updated for the latest iOS versions, devices or hardware.
