**RE: American Tower Corporation's (ATC's) Permanent "Cell-Tower" Application
40 Comstock Road, North Smithfield, Rhode Island
Verizon Wireless Letter of Intent (LOI)**

Dear Town of North Smithfield Zoning Board of Review:

As you are aware, Verizon recently had to relocate its Cell Site Installation at 40 Comstock Road to a Temporary ATC Tower so that the Town could perform required Maintenance on the Water Tank we had originally been installed on.

With this temporary move, Verizon has been able to continue to provide the latest technologies in wireless services to this area of North Smithfield, as we have for many years, and having these services un-interrupted is a must.

As such, we have been working closely with ATC on the proposed Permanent Tower Project on the same Property, so that our services for the Residents, Businesses and Emergency Services in this area can be properly maintained for the long term.

Please accept this letter as Verizon's 'Letter of Intent' (LOI) to support ATC's proposed Permanent Tower Project by planning to collocate on ATC's proposed Tower as soon as it's ready for our Installation and Activation, thereby allowing us to remove our equipment from the Temporary Tower so that it can be removed, all while maintaining our Services for the Community.

Thank you for your consideration on this matter.

I can be reached at 508-330-6678, should you have any questions or concerns.

Sincerely;
