

# Greenville Road Sewer Extension

Town of North Smithfield, RI

May 20, 2020

Louis Ragozzino, PE

# Project Purpose

## Extend Municipal Sewer Service

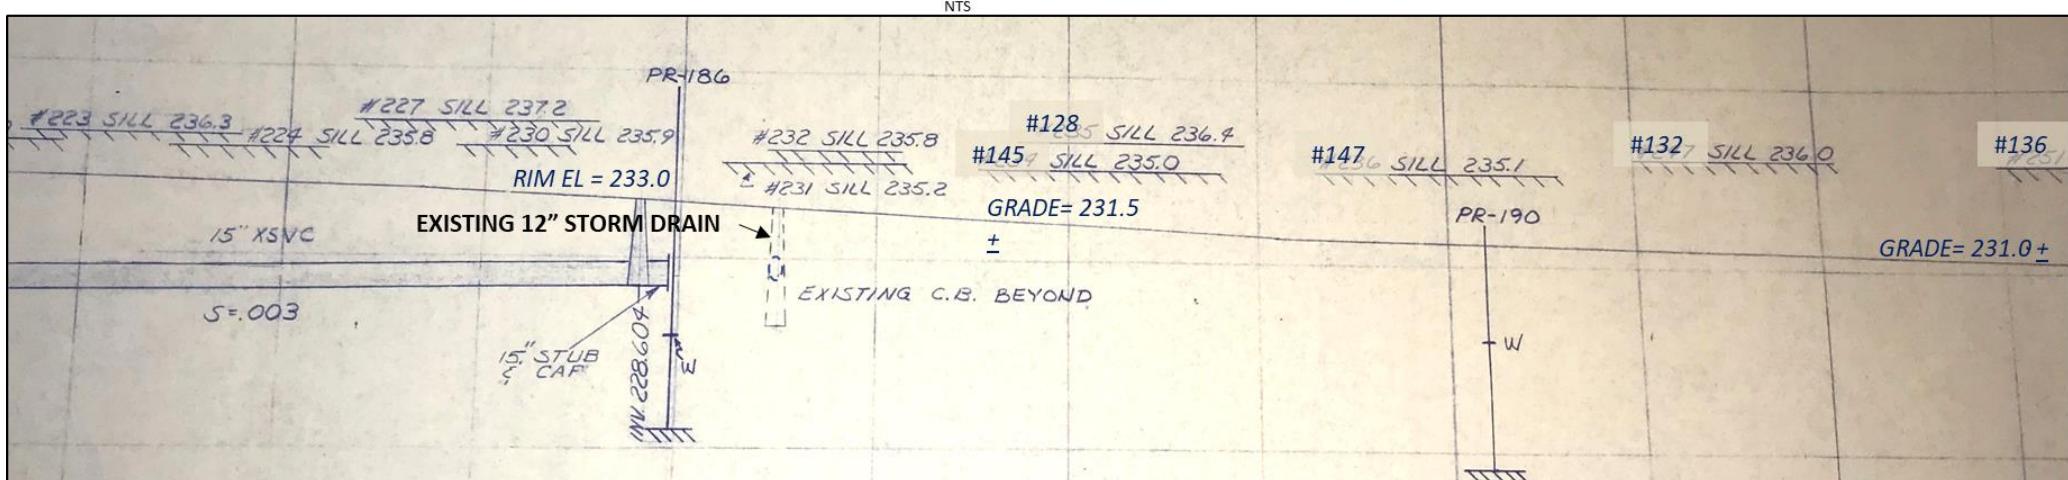

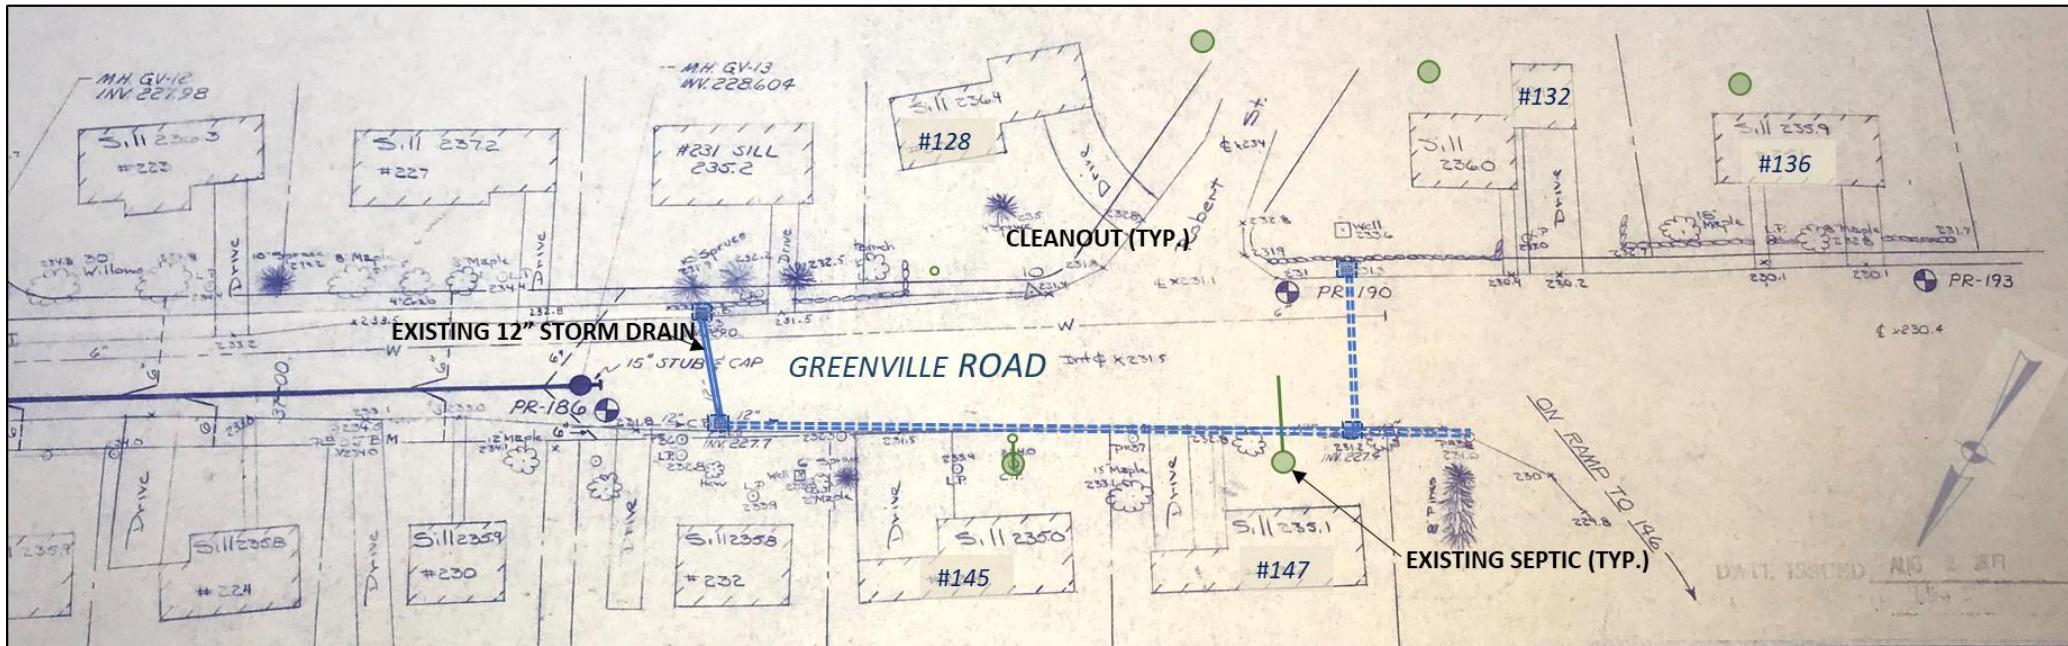

- Five houses have onsite wastewater treatment systems
- Houses identified as numbers 128, 132, 136, 145, and 147

## Existing Sewer System

- 15-inch gravity sewer system extends to within 400 feet of house No. 136
- Shallow invert at terminus manhole. Cover over 15-inch is 3.15 ft.

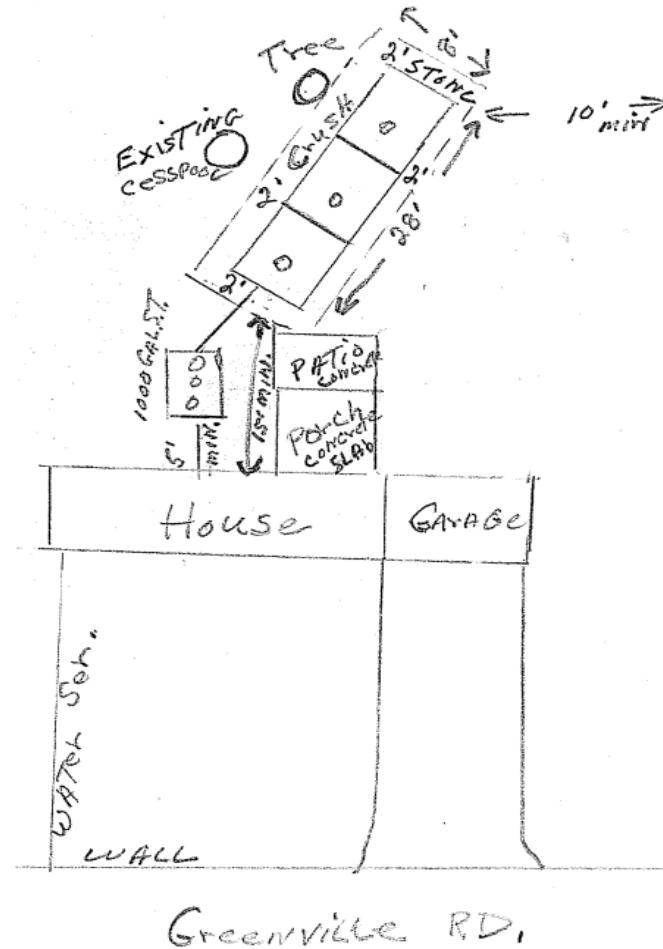

# Existing Information – Record Drawings

# Existing Information – OWTS Permits

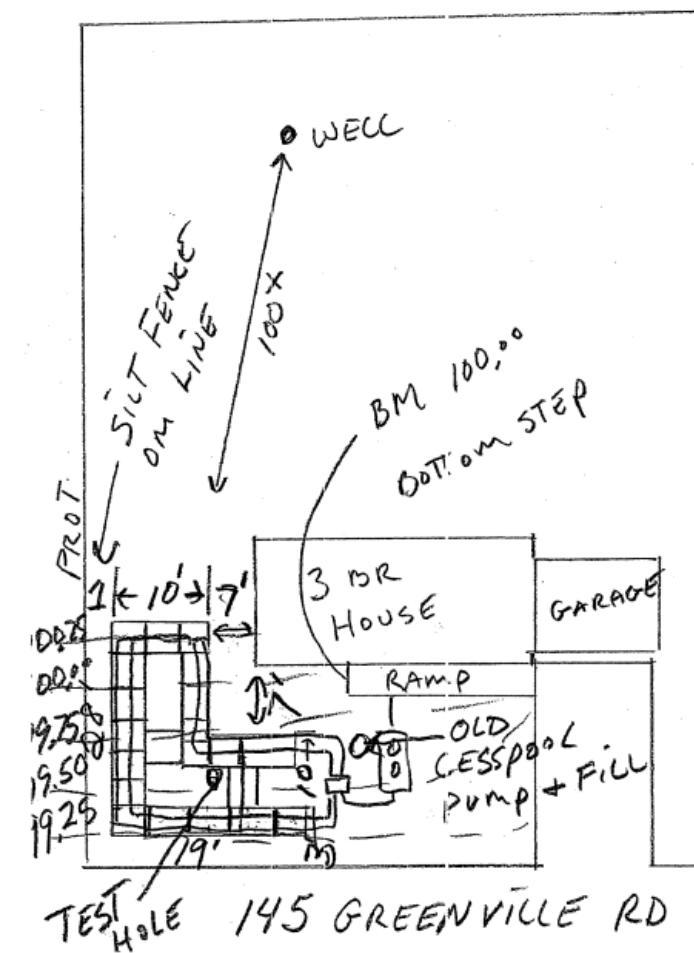

## 132 Greenville Rd. – System Replacement

**Completed - May 1993**

## 145 Greenville Rd. – Permit Application

June 2018 –Completion Unknown

# Wastewater Capacity

## Treatment

- **Woonsocket Wastewater Treatment Plant (WWTP) capacity is 3 MGD**
- **2025 Projected Average Daily Flow is 1.573 MGD**

## Pumping

- **Pound Hill Pumping Station design capacity of 1.58 MGD and was reported to have a peak flow of 0.60 MGD**

## Sewer Capacity

- **The capacity of the 15-inch sewer is 2.14 MGD**
- **Minimal slope for an 8-inch gravity sewer is 0.40 ft/100 ft. The capacity of an 8-inch sewer is to 0.46 MGD**

# Homeowner Questionnaires

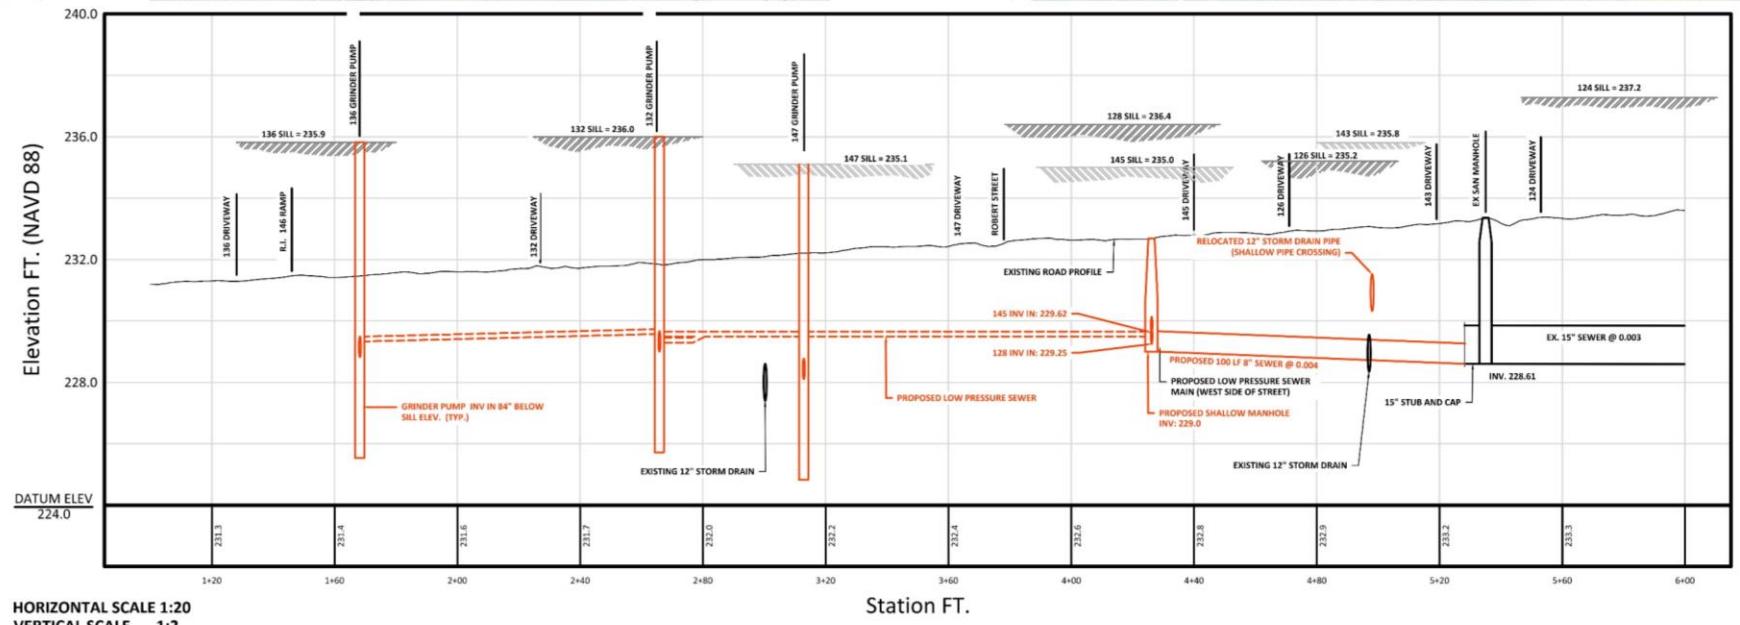

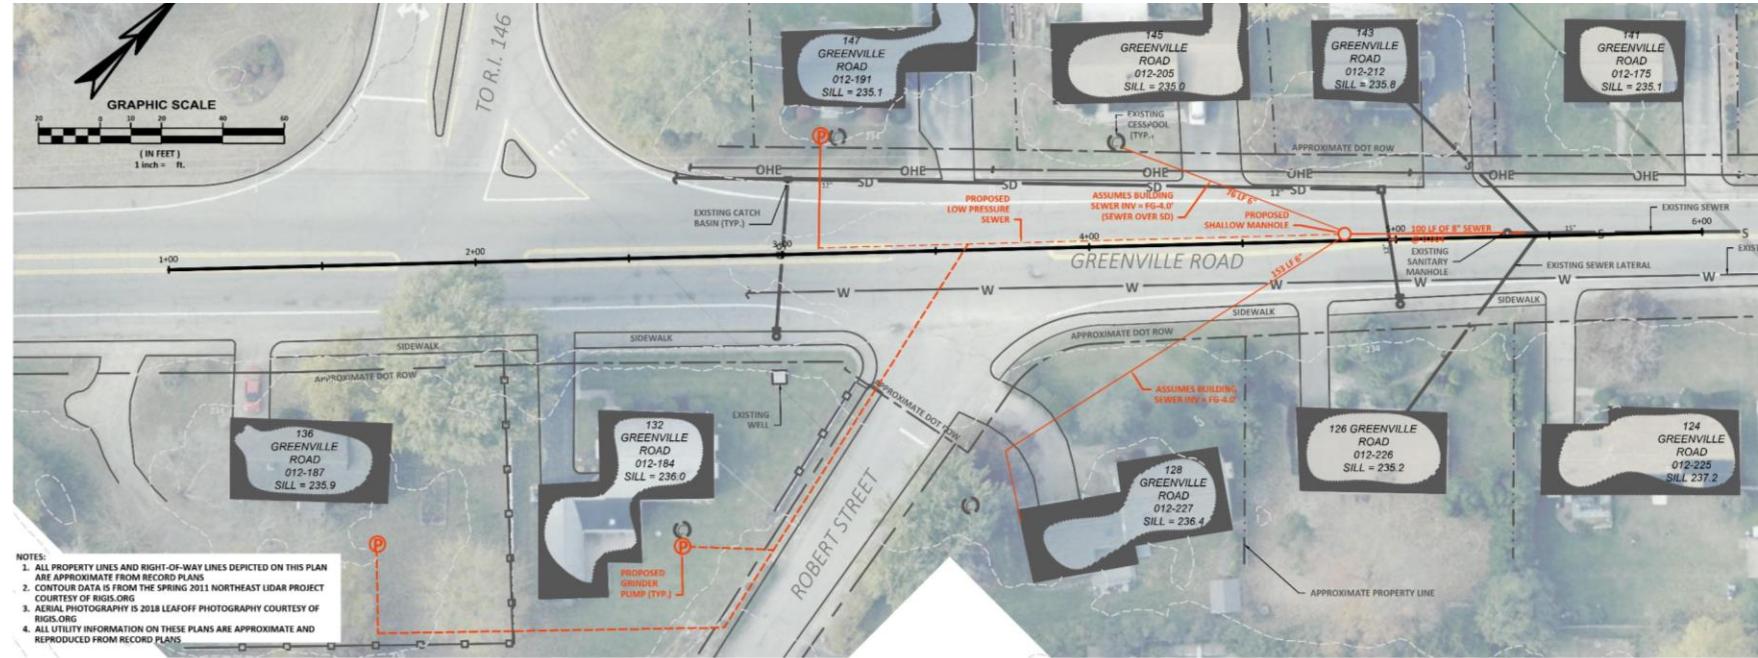

**Questionnaires sent to all five homes. 4 of the 5 reply with a favorable response.**

- **Are you interested in a connection to the municipal sewer system?**
- **Are you willing to allow Wright-Pierce and Town staff access to your property?**
- **Are you willing to allow Wright-Pierce and Town staff access to the inside of your house?**
- **If you are willing to grant access to the interior of your house what day of the week and time are best for you?**
- **Do you know what side of your house the sewage exits on its way to the septic or cesspool?**
- **Does your house have a basement?**
- **If your house has a basement, are there plumbing fixtures located within it?**
- **Are there any additional comments you would like to make?**
- **Would you like to provide an email or phone number for future communications**

# Alternatives Considered Alt. 1 - 8-inch Sewer Extension in Greenville Road

Greenville Road slopes down toward Route 146. A 100-foot long extension of an 8-inch pipe results in an invert of 229.0. Road grade is 231.5 resulting in a depth of cover over the 8-inch gravity sewer of only 1.84 feet.

Only 2 of the houses would be served by gravity.

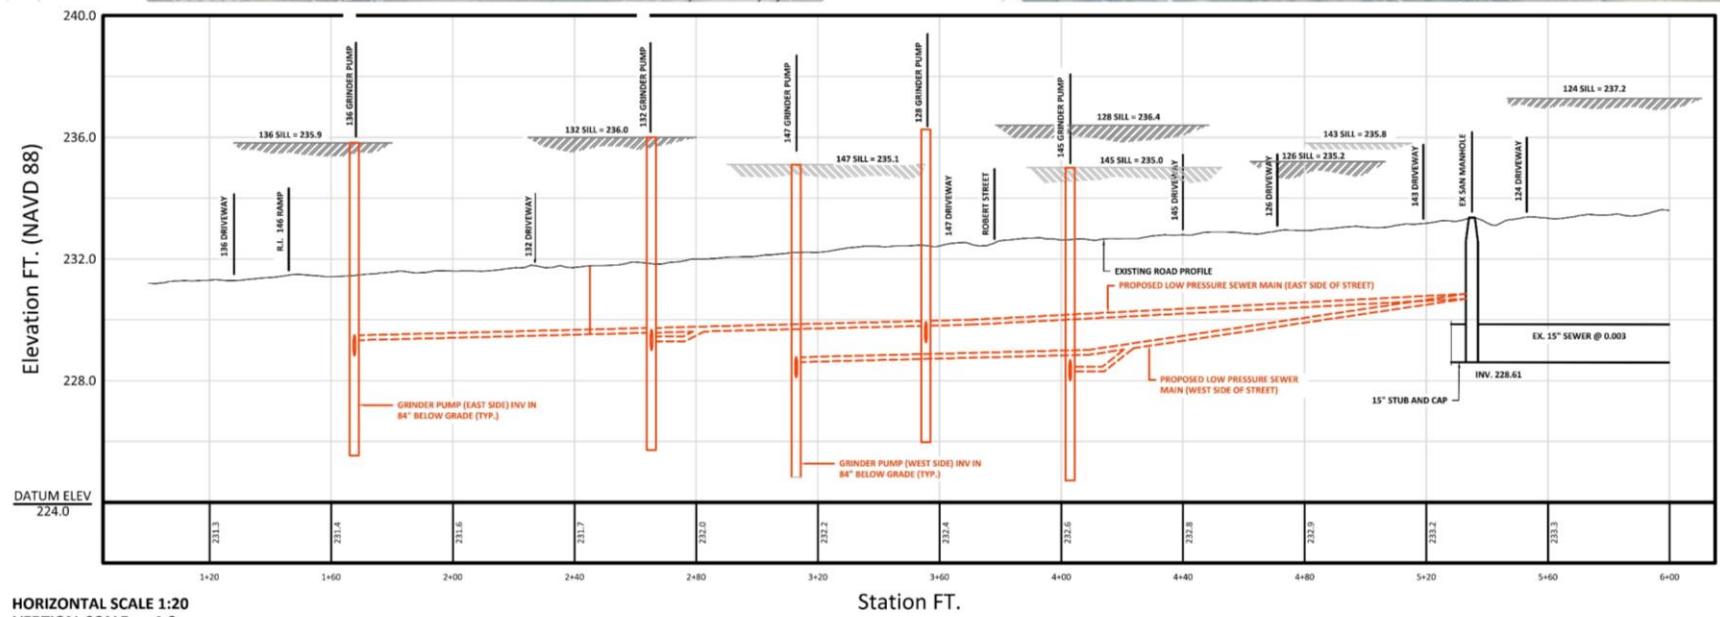

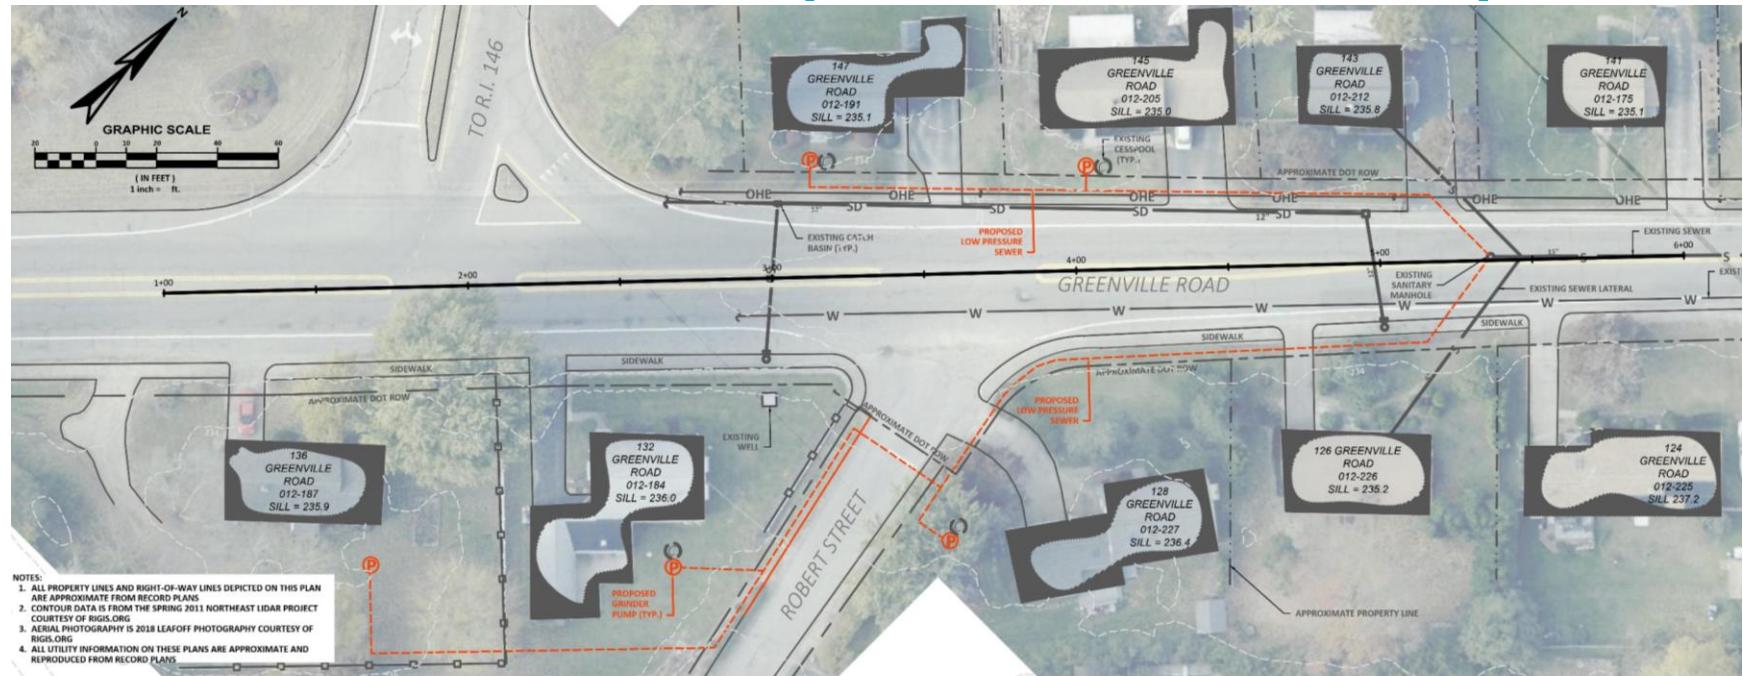

# Alternatives Considered Alt. 2 – Grinder Pump and Low Pressure System

Grinder pumps are each house.

Low pressure sewer in ROW

Possible easement behind house 132.

# Cost Comparison

## Alternative 1 – 100 foot 8-inch gravity sewer extension plus grinder pumps

ITEM	DESCRIPTION	COST
1	General Requirements	\$14,225
2	Demolition	\$7,694
3	Grinder Pumps	\$33,169
4	Low Pressure Sewer	\$70,792
5	Gravity Sewer	\$100,543
6	Traffic Control	\$4,974
	Construction - Subtotal	\$231,397
	Contingency (15%)	\$34,710
	Subtotal	\$266,106
	Engineering and Permitting (10%)	\$26,611
	Construction Oversight (5%)	\$13,305
	<b>Total Project Cost</b>	<b>\$306,022</b>
	Cost per House	\$61,204
	Annual cost amortized over 20 years*	\$3,060
	Monthly Cost	\$255
Note: * Amoratized cost does not include interest		

## Alternative 2 – Grinder pumps and low pressure system

ITEM	DESCRIPTION	COST
1	General Requirements	\$11,678
2	Demolition	\$7,694
3	Grinder Pumps	\$55,282
4	Low Pressure Sewer	\$65,861
5	Traffic Control	\$4,669
	Construction - Subtotal	\$145,184
	Contingency (15%)	\$21,778
	Subtotal	\$166,961
	Engineering and Permitting (10%)	\$16,696
	Construction Oversight (5%)	\$8,348
	<b>Total Project Cost</b>	<b>\$192,005</b>
	Cost per House	\$38,401
	Annual cost amortized over 20 years*	\$1,920
	Monthly Cost	\$160
Note: * Amoratized cost does not include interest
